Flat

Professional Signage Components
Patented Sign System

e-modula

Flat, consists of modules that snap-fit in plastic clips, allowing the flexibility to change information quickly and easily.

It's a permanent solution for identification, directional, information and regulation signage with excellent quality and presentation.

Features and Benefits

Simple: Information update is easier than ever.

Modular: Change the whole sign or just parts of it, combine several modules to make bigger signs or directories.

Installation: Clips ready to install with adhesive or screws.
